

## RAILER Lesson 08– Policies

### **Objectives**

- Understand the use of policies in RAILER
- Explain the difference between local and global work action
- Understand how work actions link to RAILER Defects

### **Hands-On Exercise**

The user will use RAILER to:

1. Edit or create new cost books for work action unit costs.
2. Edit or create new policies in RAILER.
3. Setup link for defect's local work action.
4. Import/Export policies and cost books between databases.
